Indicator Lock Product Catalog 2016

Indicator Lock Company produces innovative consumer hardware products, such as privacy door locks with occupancy indicator (www.indicatorlock.com).

These products are protected by pending European and USA patents. The locks have modern design, universal handling, fit standard door preparations, are easy to install, below market price, some are ADA Compliant

We have developed several lines of standard locks (lever sets and knobs) with similar technology, but different design. The locks are available in different finishes, such as Satin Chrome (26D), Antique Brass, Satin Brass and Oil-Rubbed Bronze. We are constantly working on expanding our designs and finish options to better accommodate our buyers' needs.
